RESEARCHERS have found that the use of a "buddy" system, in which one person is assigned to monitor the safety of another, can significantly reduce the risk of injury or death in the workplace. The researchers, who are from the University of California, San Diego, found that the use of a buddy system can reduce the risk of injury or death by as much as 50% in some cases. The researchers also found that the use of a buddy system can be particularly effective in reducing the risk of injury or death in high-risk occupations, such as construction and mining. The researchers recommend that employers should consider implementing a buddy system as a safety measure to reduce the risk of injury or death in the workplace.

US, Vietnam start naval exercises

Senate to start probe on Sino incursions

By Dennis G. Hays

WASHINGTON, March 1 (AP) — The Senate is expected to start a probe into Chinese incursions into the South China Sea, a move that could lead to a new round of naval exercises between the United States and Vietnam.

The Senate Committee on Foreign Relations is expected to hold hearings on the issue in the coming weeks. The committee is led by Sen. Frank Lautenberg (D-N.J.), who has been vocal in his criticism of Chinese actions in the South China Sea.

The committee's probe is expected to focus on the recent Chinese incursions into the South China Sea, which have caused significant tensions between China and the United States. The committee is also expected to look into the role of the United States in the South China Sea and the potential for a new round of naval exercises between the United States and Vietnam.

The committee's probe is expected to be a significant development in the ongoing debate over the South China Sea. The committee is also expected to recommend actions that the Senate should take in response to the Chinese incursions.

By Raymond B. Salazar, Jr. / Special to the Philippine Daily Inquirer

Demolition in Parañaque turns ugly; 1 dead, 39 hurt
A demolition site in Parañaque turned ugly on Monday as a large crane collapsed, killing one person and injuring 39 others. The incident occurred at a site where a large building was being dismantled. The crane, which was used to lift heavy sections of the building, suddenly gave way, causing a massive crash. The resulting fire and explosion sent a plume of smoke and debris into the air. The area around the site was quickly cordoned off by police and fire departments. Rescue workers are still searching for survivors among the rubble.
